

St. Joseph-Ogden CHSD #305 Mission/Vision Statement

St. Joseph-Ogden High School is committed to nurturing the development of the total child, to fostering a love of learning, and to providing instruction in the basic skills required for active and involved citizenship in our country and community. We also strive to maintain an environment that sustains the safety, well-being, intellectual stimulation, mutual respect, and enthusiasm of all students, staff and families.

Through shared decision-making, all parties support opportunities for a variety of teaching and learning formats. Technology is implemented throughout the curriculum in order to engage students in active learning. The school administration promotes a culture whereby instructional innovations and leadership are shared and encouraged. The school and the wider community work together to develop and enhance the educational programs and to use our resources to the benefit of all students.
